

TechTip #26 - Typing test on-screen scrolling (PC-based users only)

If a PC-based installation has not been completed, or has been corrupted during installation, there is a remote possibility the typing test text will not scroll when a candidate has reached the last line of on-screen text.

To correct this anomaly, follow these instructions to “register” edt32x20.ocx

This applies to PC-based licenses only.

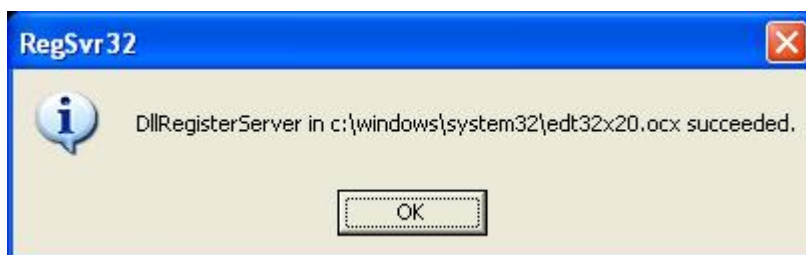

1. Go to the command prompt via START | PROGRAMS | ACCESSORIES
2. Type `cd\` and press **enter** key
3. Type `cd\windows` and press **enter** key
4. Type `cd\system 32` and press **enter** key
5. Type `regserv32.exe c:\windows\system32\edt32x20.ocx` and press **enter** key

A screenshot of a Windows XP Command Prompt window. The title bar reads 'c:\ Command Prompt'. The window content shows the following text:

```
Microsoft Windows XP [Version 5.1.2600]
(C) Copyright 1985-2001 Microsoft Corp.

C:\Documents and Settings\John Lescohier>cd\
C:\>cd\windows
C:\WINDOWS>cd system32
C:\WINDOWS\system32>regsvr32.exe
C:\WINDOWS\system32>regsvr32.exe c:\windows\system32\edt32x20.ocx
C:\WINDOWS\system32>
```

6. The following response screen should appear

NB: This TechTip applies only to PC-based licenses with SkillCheck version 5.x and higher.
