

TechTip #31 - Anti-Virus/ Firewall Protection (All online users)

From the outset of SkillCheck Pacific Pty Ltd, we have always used a commercial anti-virus software product to protect our computers from unwanted “guests”.

We recommend those with Vet Anti-Virus/ Firewall from Computer Associates **disable that product** when using SkillCheck Online Testing Service.

In all cases, we believe Windows Firewall, in all its forms, is insufficient and a more robust solution should be used.

We do not recommend any particular anti-virus/ firewall software product.

You are encouraged to make your own enquiries based upon your own needs.
